3. System Requirements

System Requirements:

Adore Infotech recommends following Hardware and operating system specification

Hardware Requirements: Intel Core i5 Processor /8 Gb RAM/1 TB HDD

Software Requirements:

- Linux CENTOS 6.x (complete installation)
- Yum Server

Internet connection:

The use of a 1Gbit Ethernet card is a prerequisite for Adore system with good broadband Internet connection.

Pre-installation Considerations:

Here is some information that we think is worth knowing prior to installing the Adore IPPhone 2 Phone System.

- Linux server should be on public IP
- SSL Certificate should be install on the Linux server

Carrier:

Carrier which supports SIP calls, g711, g723 and g729 codec.

Installation:

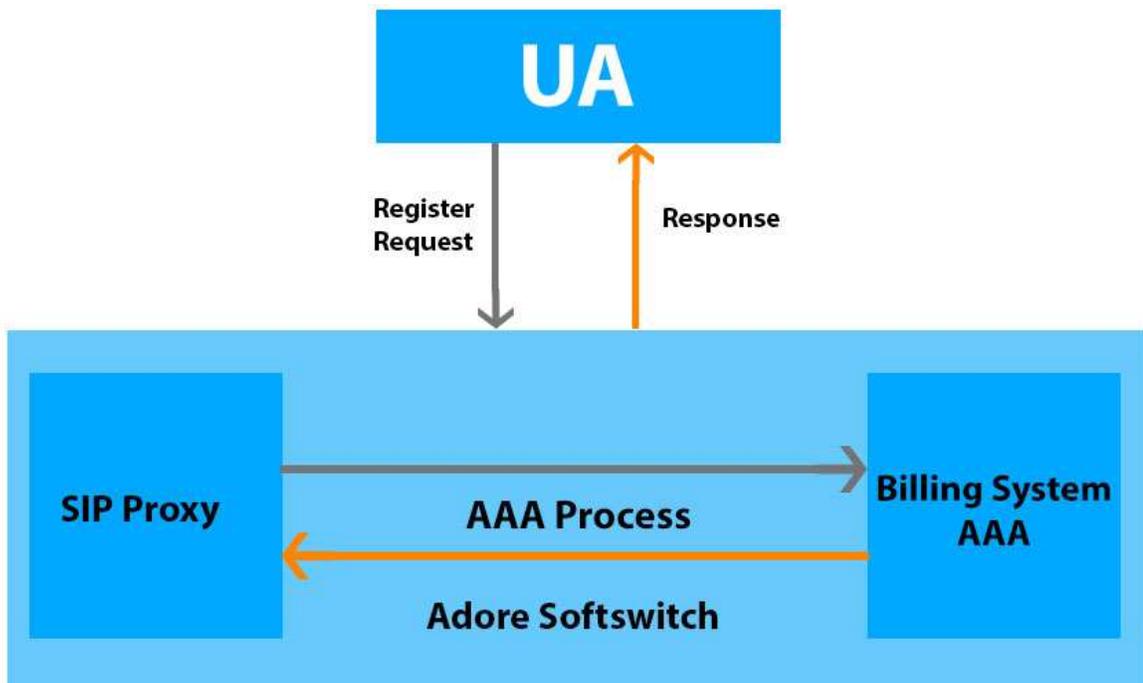

AdoreInfotech requires remote access of server for installation. The installation will be done by SSH connection on Linux server. Its installation requires internet facility and the time taken for its set up mainly depends on the nature and amount of customization to be done and the nature of service provider's infrastructure. Our competent and reliable force of engineers renders spectacular services in solving every bit of installation related problem.
